

Integrated Security Management/Video Surveillance System for the Entire Enterprise

- Network based security that covers all your facilities anywhere in the world
- ViconNet Video Forensics takes MAXxess Security Management systems to a new level
- Completely automated and event driven.
- Combines alarms, high-quality video, web based information and all control functions in one system
- ViconNet provides a true video surveillance system with capabilities such as: logical camera grouping, email or text alerts, flexible fps settings, web browser plug-in and the Virtual Matrix Controller
- Easy to install and use

Vicon® Industries Inc and MAXxess Systems have joined forces to create a powerful, integrated Security Management and Video Surveillance system that combines the two technologies for a complete security solution. MAXxess products are known for expanding the boundaries of enterprise security, and now they are even better with ViconNet seamlessly integrated into the AXxess™, ViewPoint™ and EndPoint™ product lines. The MAXxess system and the ViconNet Video Viewer run on the same network, minimizing operator interactions.

In a typical application, when an event occurs, the MAXxess system displays the nature of the event, the location of the event and the policy and procedures regarding that event. It also simultaneously notifies the relevant personnel that have been pre-designated to either respond or be made aware of the event.

The MAXxess system interacts with the ViconNet module to provide the related video. Video forensics are generated along with an event log to provide a complete record of the incident.

With a MAXxess and ViconNet system, you can do all of the following:

- Display the cameras that are the most relevant to the event
- Display any camera or set of cameras upon request.
- Play and record video for any camera with full playback control
- Select an event from the event list and play back video related to the alarm event
- Store the video events and security management events such as access control and alarms in one central database
- PTZ Control of the cameras
- Configure PTZ cameras
