

# MAXXESS

The **MAXXESS eMAX-MR16in** is a multi-device interface panel providing the ability to monitor high concentrations of inputs together with a low requirement for output control.

The eMAX-MR16in is capable of supporting 16 general purpose input circuits which can be individually set for normally-open or normally-closed operations and can be declared supervised and non-supervised. Individually configurable parameters can be set for sensitivity ranges, timing parameters and end-of-line resistance values.

Two programmable relay outputs can be configured for fail safe or fail secure operation, supporting "On", "Off", "Pulse", and "Repeating Pulse" commands. With these powerful control-point capacities onboard, the eMAX-MR16in is capable of controlling outboard devices. It can also be activated by the condition of selected system devices locally or regionally without host intervention.

### Application Notes

The eMAX-MR16in is an integral component to support MAXXESS's flexible, building-block approach to access control system design. The eMAX-MR16in provides the capacity to link, control and respond to an array of sensors. With its RS-485 connectivity, it can be clustered or distributed to best suit the installation environment.

## Input Controller eMAX-MR16in

### Features

- 16 programmable inputs; 2 programmable relay outputs
- 2-wire RS-485 communication
- AES 128 bit data encryption
- Universal I/O device characterization
- Configurable input parameters
- Compatible across Mercury's intelligent controller families

### Benefits

- Built-in capacity to control, respond to external device commands
- Easily integrates lighting, heating/cooling, door or elevator control sensors
- Initiate commands by operator, by time schedules, or by events

**Proven Platforms  
for the Future**  
Reliable. Proven. Innovative  
Access Control.

# System Controller eMAX-MR16in

## Technical Specifications

**Primary Power:** 12-24 Vdc +/- 10%,  
350mA maximum  
12Vdc @ 300mA nominal  
24Vdc @ 220mA nominal

**Communication:** RS-485, 2-wire, 4,000'  
(twisted pair with shield,  
Belden 9841)

**Inputs:** 16 General purpose:  
programmable circuit type  
2 Dedicated: Tamper and Power  
Monitor

**Outputs:** 2 Relays: Form-C, 5 Amp 28 VDC

**Dimensions:** 6.0' W x 8.0' L x 1.0' H,  
(152mm W x 203mm L x 25mm H)

**Temperature:** 0-70°C operational,  
-55-85°C storage

**Humidity:** 0-95% RHNC

**Standards:** UL294 Recognized, CE Compliant,  
ROHS,
